## WORK EXPERIENCE

### Educator

#### BrainStation

📅 January 2024 - current

📍 New York, NY

- Facilitates 12-week intensive engineering cohorts, guiding 10-40+ students per session to execute cutting-edge tech projects.
- Researches and develops new content across multiple domains within the curriculum to teach the most up-to-date skills software development to students.
- Develops internal tools to improve team workflow and additional lessons to supplement curriculum for students.

### Associate Educator

#### Brainstation

📅 March 2023 - January 2024

📍 New York, NY

- Taught and delivered lectures and mentored the next wave of engineering talent by providing expert technical guidance to 100+ students.
- Led students in developing innovative projects with cutting-edge technologies and taught core concepts of software engineering.

### Software Engineer

#### Wunderkind

📅 Jan 2022 - Jan 2023

📍 New York, NY

- Integrated internal platform with client campaigns using vanilla JavaScript and in-house tools, resulting in an increase in team efficiency and reducing code errors by 15%.
- Developed and maintained APIs, enhancing performance and reducing server response times, while ensuring code cleanliness and efficiency.
- Reviewed peer code, contributing to an improvement in code quality across the team, and assessed tools and resources to increase web accessibility compliance.
- Utilized JavaScript, HTML, CSS, and jQuery to create user-friendly marketing campaigns for over 100 major companies, improving campaign engagement rates by 10%.

### Freelance Web Designer & Manager

#### (self)

📅 Mar 2020 - current

📍 Astoria, NY

- Designed and maintained websites for 7+ clients, using JavaScript, React, HTML, and CSS.

### Website Manager/Executive Officer/Musician
